

IMPORTANT MESSAGES REGARDING FINAL:

- (1) Bring your calculator to the exam
- (2) One sheet of paper with formulae you choose. No textbook.
- (3) Exam will test your *basic understanding* of the concepts covered in the course, including possibly asking you to derive formulae derived in the textbook or in class.
- (4) Remember: It is important to show **CLEARLY** the steps in your derivations. Just writing the answer will not give much credit.
