

Problem Sessions

(1 ½-2 hours per week, as scheduled)

- Problem Sessions are an essential part of this course. Problem Sessions and homework count for 40% of the grade.
- Problem Sessions are an “audience participation” event. YOU TEACH EACH OTHER, with comments from the instructor.
- The instructor will be available for 30 minutes after the problem session to answer questions individually or in small groups.
- You all are expected to present, discuss, and elucidate solutions to the homework in the problem session.
- Selected students will be tasked in advance to present in the upcoming problem session. Part of the job of presenters is to prepare a set of solutions, for posting.

N.B. Students who present a given set will need to be prepared before the official due date for that set.
- It is the responsibility of presenters to send their solutions to the TA by the assignment due date, so that a solution set may be assembled.
